

New Planter Boxes at the DCC Apiary

This year, we have a GCG grant and an IAF grant both aimed at increasing forage for our honeybees and native pollinators.

Thanks to the generous time and wood working skills of local volunteers, Kieran and Mike, we have four new planter boxes. These have been planted with perennial pollinator-friendly plants that will bloom successively from early to late summer. MyGardenBag supported our venture as well with ample soil.

Thanks goes out to all our volunteers who continue to support this project as well.
